1. Includes donations earmarked for a range of specific purposes.

2. Includes donations earmarked for BYM central funds, in the region of three to four thousand pounds in recent years.

## 1.2. Reduction in lettings

Secondly, the report mentions that the loss of letting income from a number of large institutions over the last few years accounts for a significant percentage of the overall lettings decline. There have been around half-a-dozen such losses, each accounting for in the region of one to two thousand pounds per annum.
